# AYUSH KUMAR SINHA

**Software Engineer**

+91-9546622299 | ayush.807sinha@gmail.com | B.S.City, Jharkhand - India | LinkedIn | GitHub | LeetCode

## EXPERIENCE

### SDE Intern - Android

**SRAJAN**

Mar 2025 – Sept 2025 | Remote

- Enhanced core features of an Ed-Tech Android application using Kotlin and Jetpack Compose, improving delivery speed by 30%.
- Integrated REST APIs and optimized data handling, reducing data retrieval latency by 25% and improving app responsiveness.
- Worked on API-to-UI integration, ensuring seamless communication between backend and frontend systems.
- Collaborated with design and backend teams across the SDLC for efficient development and smooth deployments.

## ACHIEVEMENTS

- Solved 150+ Data Structures and Algorithms problems across multiple platforms, strengthening problem-solving skills across diverse algorithmic patterns.
- Achieved a 1500+ rating on LeetCode through consistent participation and practice in competitive programming.
- Led a team of 5 members at BPUT for the PROXIM project, coordinating development efforts and contributing to the successful implementation of the project.

## TECHNICAL SKILLS

- **Programming Languages:**
  Java, Python, Kotlin
- **Backend Development:**
  Spring Boot, Spring MVC, Spring Security,
  REST APIs, JPA, Hibernate,
  JWT,Microservices
- **Microservices & Messaging:**
  Spring Cloud, Eureka,
  API Gateway, RabbitMQ
- **Frontend Development:**
  React.js, JavaScript, HTML, CSS,
  Tailwind CSS, Axios
- **Databases:**
  MySQL, MongoDB
- **Tools:**
  Git, GitHub, Postman,
  IntelliJ IDEA,
  VS Code
- **Core Concepts:**
  Data Structures & Algorithms,
  Object-Oriented Programming,
  Operating Systems,
  Database Management Systems,
  Computer Networks

## EDUCATION

### B.Tech. in Computer Science - 8.49 CGPA

**GITA Autonomous College**

2022 – 2026 | Bhubaneswar, Odisha, India

## PROJECTS

### FitAI – AI-Powered Fitness Management Platform

- **Java | Spring Boot | Spring Cloud | React.js | MySQL | MongoDB | RabbitMQ | SDLC**
- Built a microservices-based fitness platform for user management, activity tracking, and AI-powered fitness analysis.
- Developed REST APIs using Spring Boot and implemented Eureka Service Discovery and API Gateway for scalable microservice communication.
- Integrated RabbitMQ for asynchronous communication between microservices and the AI service, and developed a React.js frontend for fitness tracking and AI-generated recommendations.

### PROXIM – VR PC Gaming via Android Head Tracking App Backend

- **Kotlin | Python | WebRTC | FFmpeg | UDP Sockets**
- Built a VR gaming system using gyroscope-based head tracking and low-latency communication.
- Designed a client-server architecture with virtual gamepad emulation for PC games and implemented real-time video streaming using FFmpeg and WebRTC over RTSP.
- Achieved 35–42 ms latency with stable 60 FPS streaming across multiple PC games.

### AI Resume Screening & Job Matching System – Mini Project

- **Python | Groq API | Pydantic | PyPDF | python-docx**
- Built a CLI-based AI resume screening system to evaluate multiple candidates against job descriptions.
- Implemented PDF/DOCX parsing and LLM-based extraction to structure resume and job data.
- Developed AI-based matching and scoring to identify relevant skills and rank candidates based on job requirements.
- Generated matching skills, missing skills, experience assessment, and recruiter verdicts, with automatic candidate ranking by match score.
